To add an event to the tournament calendar, you must be a registered user and logged on to the Arizona Hot Shots website. Once you are logged on, click on the Tournaments link at the top of the Arizona Hot Shots website. From the tournament calendar page you should see the Add Event link above the calendar. All events must be approved by Arizona Hot Shots first before they appear on the calendar. If you are having problems adding an event, or would like someone from Arizona Hot Shots to add the event for you, please email us by using the link below, and sending the following information.
